PERSONAL PROFILE

I am qualified web designer with a strong background in computer maintenance and the use of computer software. Have up-to-date knowledge of IT systems. An excellent problem solver who is goal orientated and capable of achieving personal objectives, as demonstrated by the successful completion of my college courses, I am keen to find a challenging position that offers long-term potential to further develop my abilities.

SKILLS AND ACHIEVEMENTS

Technical Skills

- Interface design and authoring
- Hardware installation and maintenance
- Network building and maintenance

Analysis and Problem Solving

- Whilst at college, analysed PHP Authorising procedures and developed a new, efficient system that was more cost effective and accurate.
- Ability to look at every possible issue in a situation and identify correct source of any unexplained problem; therefore, able to find appropriate solution to rectify, saving cost of equipment and lost time

Communication Skills

- Able to inspire a positive attitude in others to accepting and using new procedures that I initiated, as demonstrated by effective implementation.
- Competent user of computer software including Office, Adobe CS and Windows.

RELEVANT WORK HISTORY

- Computer systems maintenance
- Web design
- Problem Identification
- Network installation and improved, quality provision
- Customer service

ADDITIONAL INFORMATION

A complete work and educational history is available if required.

I have a current PVG, which allows me to work with vulnerable groups.

I get a lot of satisfaction from keeping my IT skills up-to-date read manuals and magazines to ensure that my abilities are current.

My voluntary work as an IT tutor is also a great help in keeping my skills up to date and I find it very rewarding to pass on my knowledge.

I also enjoy hill walking, this keeps me fit and is a great way to relax and get out into the open air, especially when I have spent a day at my computer desk!
